

TESTIMONIALS ABOUT MAX

AGING

Hilda Knopke, Calgary, AB - My father who is 87 years and my mother enjoy wintering in California. However this year appeared to be their last. Prior to taking Cellgevity my dad was in poor health. He had severe pain in his back due to degenerative disc disease – the doctor said that he would be in a wheelchair soon. He had no energy at all so his days at the California resort were spent sitting in a chair. Mom put up a For Sale since she could not carry the load by herself. Soon after taking Cellgevity my dad appeared to have more energy – he could even walk down to the rec centre and play shuffle board. He also started helping with the meals and dishes. Mom also noted that he is easier to live with and not so moody. As a bonus he does not need the breathing machine that he used at night. He is also eating better and his blood sugar is down (he is diabetic). He told me that this is the first product that he has ever taken that he knows it is doing some good. Needless to say Mom has taken the For Sale down!

ALLERGIES

Holly Lorette - I am from Prescott, Arizona. Allow me to tell you a little about myself. Ten years ago (1997 Oct 20) I came down with Chronic Fatigue and sometime after Fibromyalgia. It took about 2 years for these conditions to run their course. My Chronic Fatigue was caused by being on the wrong thyroid medication. After getting on the correct medication, I improved some, but still had residual symptoms. I would get wiped out really easily and had very little energy. I started the MaxGXL in June of 2008. I now have more energy than I have had in my whole adult life! About 5 years ago I also started having allergies and now they are gone. My brain fog is so much improved to that I feel the Max has given me my old personality back. I'm happy, fun loving and joking all the time. I have good energy all day and I don't fade in the afternoon. No more coffee in the morning just to get me going and none in the afternoon to get me through the end of the day. Since my early 20's I've been a bit of a vitamin nut. I took a great multi but had to add more vitamin c, e, alpha lipoic acid, colostrum, garlic, etc as my conditions progressed. You get the picture? I would take a fist full in the morning and more at bedtime. I would get a little jealous when a friend would say that they had started something new and they had all this energy. That would never happen to me . . . until I tried the Max products! N Fuse is a bioavailably delivered vitamin and mineral supplement using oral nano-technology. With N Fuse and GXL, now I know what everyone else was raving about. The boost in energy is amazing! I am assimilating more of the vitamins and minerals than I ever have before, and my glutathione level has risen substantially - I know this because I can feel the difference.

Jillyn - In February 2006, working as a teacher I, Jillyn, at 52 years old was tripped in the hall and landed on my left knee. It immediately swelled up and I struggled to walk. I was sent to two doctors, one was an orthopedic surgeon I had X-rays, and an MRI done. I was told my MRI showed a meniscus cartilage tear. It hurt so bad I couldn't sleep and I walked with severe pain. I was given Prednisone and Amitriptyline to bring down the inflammation and the pain, but to no avail. I was on crutches for a month but that didn't help either. Then in April 2007, over a year later and still in pain, I was then sent to another orthopedic surgeon who really is a specialist in knees. He said I definitely needed **surgery**. But I am allergic to a lot of anti-inflammatories so I wanted to think about it for a few weeks. I then heard about the glutathione supplement and started taking it to see if it would help my fibromyalgia which I was diagnosed with in 1980 by a rheumatologist. Some symptoms of fibromyalgia, besides pain and lack of energy that I also struggle with are severe insomnia where many nights I did not sleep at all and a lack of mental clarity.

The longer I was on the glutathione supplement, the better I felt. After about 2 months of taking it I noticed increased mental clarity, my energy level was up and there was less stiffness in my joints and muscles. I sleep better and I feel better than I have in 27 years! I am sleeping all night, every night, and my knee is NOT painful anymore. Now 1 ½ years since the fall, Oct. 1, I had a follow up with the knee specialist, the orthopedic surgeon who I saw last April. I was concerned about the **surgery** and when to have it. After my exam he wrote up the results and asked if I wanted a copy. In those results he wrote, '**PLAN:** Because her symptoms have shown signs of resolution and her exam is benign today would recommend holding off on **surgery** for now. Continue to follow on a conservative basis using the glutathione supplement. Since the inflammation is now resolving, it will take another 6 months or so for complete healing.'" My orthopedic surgeon then explained

that by keeping the inflammation down with the glutathione supplement my body has been able to work on healing my meniscus cartilage tear. He then recommended careful exercise to build my knee strength, so the very next day I walked ONE mile on it, which I had not dared do, and my knee felt fine. I am ecstatic! My knee is doing wonderful, NO surgery needed, my fibromyalgia seldom bothers me anymore, I have more energy, better mental clarity and I sleep every night. For years I have also had severe allergies. And after four months on the glutathione supplement, I was able to keep my allergies completely under control. I felt normal and even forgot about my allergies until one day my husband asked me why I wasn't suffering with them. I said I was only taking my glutathione supplement and had no allergy symptoms.

ARTHRITIS

Diana Pettit, Calgary, AB – Before I went for **surgery**, friend told me I should take MAXGXL to help the healing. When I had the **surgery**, the doctors were amazed at how little bruising I had. Another lady with the same surgery was bruised all over. I showed my surgeon the MAX and he said, "Keep on taking it!" I have had **arthritis** in my legs for about 6 years. Since being on MAX, my **arthritis** is completely healed. Also, I am a teacher, and write on the board for many hours in a day. My students know that I would always have shoulder pain, and my writing would deteriorate. I do not have any pain raising my arm to write on the board any more! So I went to the chiropractor after 4 months of no visits, and he asked me how my back was – I told him – "It is perfect,.. and now you are going to tell me the truth". He measured me up and said "Yup, your back is perfect – whatever you are doing, keep doing it." The only change I have made in my regimen is to add MAX GXL. I have also been able to reduce my analgesics for my **migraines** from about 1000 mgs per day to now only 1000 mgs in 8 months!!

I, am **Nick de Jong, Calgary Ab**, 75 years young. Early Jan. 2012 a friend talked to me about a supplement she sells. First I was not to interested (heard stories before). She never pushed me and because I was having some discomfort in my hands and knees I was willing to try this product MAXGXL out. After a couple of weeks I noticed an improvement in my **hands** and also in my **knees less pain** and easier movement . Right now I am able to open water bottles or jars with my hands (no more pliers), walk up and down stairs without pain. I noticed I am not using my inhaler any more (allergic to dogs and cats), I have **more energy** now than a couple of months ago. Thank you Yan for telling me about MAXGXL and MAXN-FUZE.

Gary & Sally Newton - "I have Fibromyalgia, Osteo Arthritis, Diabetes and **Degenerative Disc disease**. Most of my issues have been passed down from my parents. From the 3rd day of starting the Maxgxl I noticed an increase in energy. After a week my pain level had dropped significantly. I was noticing my hands being more flexible and my knees hurting less. I have been able to increase my daily walk from a mile to over 3 miles in the 3 1/2 weeks since I started. I have so much more energy and my spirit and moods are GREAT! This has been wonderful for me to feel this good again. It has been 20 years since I have had the energy and joy I have now. With my pain level reduced I feel like smiling all day and have been able to reduce 2 med's for my pain and stiffness and 1 med for my Diabetes. I notice that I can think more clearly and I feel 20 years younger. I had bunion surgery on my foot just before I started the MaxGXL. This was the 2nd time I have had the surgery. My recuperation time was cut in half. I was back in shoes in 3 weeks and it was 2 months before I could wear a regular shoes the first time. Amazing! * My husband is a contractor and has used his body hard for 45 years. He has been on the MaxGXL for the same amount of time as me. He calls them his "happy" pill. He has had much less pain in his hands and knees since he started GXL. The main thing he noticed is that he used to be in bed by 8 at nite and sleep thru the nite till 7 AM. Now he is able to stay up later and wake up refreshed earlier in the day. The stamina he has received during the day has been amazing. He used to come home at noon and have to take pain med's and a nap during lunch. He now plays with the Grandkids and takes no pain meds. Some of the side effects of his **Diabetes** medicines have been reduced as well since he started taking MAX. He loves the good feelings and never misses a dose. We are truly living younger and stronger with the MaxGXL. We feel as we continue to take the Max we will be able to reduce our Med's even more. Thank you for giving us our joy and health back!"

Victoria Stanley, Holly Hill, FL - I've had arthritis in my hands for years. In just a week of being on MaxGXL I can tell a big difference in my hands. I would say I've had a 50% improvement, and that's in just a week so far. I'm

so excited about this product, thanks so much!

Shirley King, Seligman, Arizona - My life and health were a mess. My myriad of diagnoses are **fibromyalgia, chronic fatigue**, chemical sensitivities, hypothyroidism, **arthritis, degenerative disc disease** and **depression**. My day revolved around taking the next pain pill, 10 mg of Vicodin, 5 times a day. I needed 10-11 hours of sleep or more every day. I was desperate to reduce my dependency on narcotics and improve my quality of life and prayed for a miracle. God sent me that miracle in the form of MaxGXL and MaxN'Fuze. I felt some effect within an hour of the first dose. Within 5 weeks I had reduced my pain medication by more than half and my energy level had increased dramatically. Now, after 3 months on the products, I've been able to greatly reduce or eliminate my pain medication, inflammatory medication, sleep medication, thyroid medication and most of my other supplements. I have incredible energy and now need only 6-8 hours of sleep. My mental clarity is improving and my mood has elevated to a level that has amazed those around me. Things that stressed me before now roll off of me like water off of a duck's back. I am a walking miracle! I've lost some weight and more inches and expect great results as I start on MaxWXL. I signed up as a distributor when I started the Max products because I needed to sell them to be able to buy them for myself. It's wonderful to increase my own financial security by simply being a messenger to help improve the health and lives of others. What a blessing to be able to look forward to even greater health, happiness and prosperity! I thank God for sending Max through my dear friend Karen and for giving me a new life in such a remarkably short time!

Theresa Kresge, Glendale, AZ - When I was first introduced to Max GXL back in May my thought was: I am healthy, I eat good and try to do all the right things, I don't think I need this, but I think it could be great for certain people with specified problems. My sister insisted I try the product and see if it made any difference for me..... so I tried a week supply of MaxGXL. It was my very first week off at the end of the school year and I had big plans for landscaping my yard. I began by digging all the Bermuda grass roots out of my yard where I planned to lay flagstone and crushed granite. After a week of digging, with the soil prepared I positioned and seated approximately 130 pieces of flagstone (some pretty sizable) followed by shoveling the majority of 13 ton of crushed granite myself. I was very concerned that I would be really hurting each night by the time bed time rolled around, as I had been dealing with sciatica issues the last couple of years. But..... I was pain free!!! I also noticed that in spite of my regular dip in energy at about 10:30 am and 1:30 pm each day, my energy level remained consistent through the day, all day. I was impressed...my introduction to Max GXL has proved to be an encouraging experience. Oh, very important, within a week the swelling was down in my hand, which I haven't been able to fully close for years, because of arthritis, and I had no pain and full use of it! Yes a very encouraging experience indeed!

Ron Harrington – Calgary, AB Here is what has happened to me since I have been on the Cellgevity. I have only been on Cellgevity for 2 weeks and I have already noticed a difference in my Migraine Headaches, my Chronic Bronchitis, the Arthritis, Depression and of course fatigue and my memory seems to be better as well as sharper.

First: lets touch on the **Migraine's**: I have been on medication for some time to help control my Migraines and since I have been on the Cellgevity I have noticed that I am No Longer taking pain pills like they were candy, the Cellgevity has settled the pain and the severity of the **Migraines**.

Second: my **Chronic Bronchitis**, which I got from smoking for almost 40 years , I have since quit smoking (June 26 2011), and I have been smoke free ever since, I used to use my inhaler 1-2 times per day, but since I have been on the Cellgevity I have only used my Inhaler once and that was because I was exerting myself by helping a Friend Move.

Third: My Arthritis which I have in both of my hands, lower back and in my right foot. Since I have been on The Cellgevity I have been able to do my Leather Work with no problems doing the hand punching of the holes in the leather, I am making Moccasins for a customer and I used to have to pick my days when and how much hole punching I could do at one setting, not to mention using pain pills and creams to help relieve the inflammation in my hands.

Fourth: I have been fighting **Depression** for years and with the Cellgevity I feel much better about myself and I NEW increase in Energy has made feel even better.

Fifth: The **Fatigue** comes from the **Depression** which is now gone, and so is the fatigue.

Sixth : My **memory** has been a lot better and sharper since I have been on the Cellgevity.

I know that this is not typical of people taking this product but so far it has worked for me and I know that can only improve from here. Keep taking the products for as long as it takes for each person to feel the benefits of these products, you have to find the products that work for you as each person is different, in their body chemistry.

ASTHMA

Verna – Calgary, AB Here is an article that I found online one night while doing some searching that I thought I'd share with you. I have been taking a vitamin supplement since October 2011 called **MAXGXL**. It has made such a difference in my life!

I am **no longer** in **pain** from my **arthritis!** I **no longer** have to take an **asthma inhaler!** I **sleep every night** without a sleep aid! I **don't suffer** from **headaches** everyday! My overall health has improved greatly!!!

Please take the time to read the article and pass it on to anyone you think might benefit from this amazing new discovery in the medical sciences.

Article: http://www.huffingtonpost.com/dr-mark-hyman/glutathione-the-mother-of_b_530494.html

The product I take MAXGXL, enables your body to make Glutathione.

BACK PAIN

Jack Williams, San Diego, CA - Simply a miracle. I've had back pain for over 20 years from a horrible car accident I was in. I would wake up every day with dreadful pain all down my back. It was a terrible way to live my life. Last week was the first week of my life that I didn't wake up the dreadful back pain! I am so thankful that I found out about MaxGXL. I can actually do yard work again, play with my kids, and live my life! MaxGXL is a miracle.

Dawn Reve Neymeyer - For many years I have had lower back pain. I take prescriptions and get steroid injections to help manage pain, so I was excited to try MaxGXL. A few weeks into using MaxGXL, I noticed positive changes occurring which continue to impress me; I no longer have to stretch out before getting out of bed and have more energy & motivation.

Michelle Davis, Sunnyvale, CA - Back in 1999, I **injured** my **back** at work. I ended up with some **nerve damage**, 7 discs that were ruptured, and my vertebrae were flanged and spurred. I could not walk, lift, bend or stand for any length of time without pain. There was also some torn muscles. There was nothing that could be done and an operation would not make any difference. A real good friend asked me to try MaxGXL™, so I did. My back doesn't hurt, I can move around without pain, I can even take my own trash out to the dumpster now!. I also now have more quality sleep along with more energy when I am awake. It is AMAZING! I am telling everyone about this amazing product!

C. L., Bay Area in CA - A few years ago, I injured my **neck, back** and **knee** at work and haven't been able to do much of anything since. The pain is constant and I haven't been able to get any **sleep** because of the pain waking me up several times a night. I have sharp pains when I try to sit. When I try to get up, I have to do so very slowly so my body can adjust some to the pain. My knee is constantly swollen with a huge knot on the back of it. I literally could not walk 50 feet and that was with me having to drag my leg. I could only stand to do a few dishes at a time. The pain was constant and excruciating, not to mention the constant **headaches** I was experiencing from the neck injury. Then my neighbor asked me to try MaxGXL™. I took it as directed. Other people noticed the change in my ability to walk and move before I did. I did notice that the pain was exceedingly less and that the swelling on the back of my leg was significantly less. I could stand longer, walk

farther, not drag my leg, and the headaches were less. I started getting good quality sleep. As a matter of fact, I slept for 7 hours straight. I have not been able to do that in many years. Because of the detoxing effect of MaxGXL™ and the fact that I have only 1 kidney, I had to decrease my daily MaxGXL™ to just 1 capsule, but I am still seeing the healing taking place. Also, I am **allergic to strawberries and chicken**. But, I love to eat them. When I do, I break out in hives. Since taking MaxGXL™ **I have not gotten the hives when having strawberries or chicken**. I would recommend anyone to take MaxGXL™. It has made a very real change in my life!

Idaho CEO --Ken Franklin "For many years I've had **lower back pain** and take prescriptions + get steroid injections to help manage pain, so I was excited to try MaxGXL. A few weeks into using MaxGXL I noticed positive changes occurring which continue to impress me; I no longer have to stretch-out before getting out of bed and have more energy & motivation. Pain

Elaine, Burnet, TX - I have been experiencing **severe back** pain for several years now. After 10 days or so, my back pain began going away. Today after 3 1/2 months, my pain is completely gone. I can now bend over to take laundry out of the washer and lean over a counter without pain. I'm also seeing a major increase in my energy, and I am able to deal with the day to day life issues more easily.

Ken Franklin, Police Officer - On July 1, 2002, I was struck by a vehicle which caused me to receive injuries that later forced me to retire from my job as a police officer. During this accident, the muscles in my **upper back** were **torn** from my **spine** leaving me with injuries too severe to continue on in police work. For more than five years after the accident I lived with the daily discomfort and stiffness that this injury left me with, and frankly I had just learned to live with it. Then a friend introduced me to MAX GXL and my back has been free from the discomfort ever since that day I took my first capsules. Too good to be true you say? I'm free of that now, and with the added benefit of more energy, I feel better than I have in twenty years. I truly am living to the MAX!

CANCER

Lee Hemminger, Bar Harbor, Maine - In July of 2007 just prior to my son's wedding, I was diagnosed with lymphoma They did a lumpectomy as the tumors were under the skin around my neck and upper back area. Upon biopsy they learned that the cells had metastasized from somewhere, but after months of testing they could never locate the origination point of the cancer within my body. January through April of this year, I underwent extra heavy doses of both chemo and radiation, with no opportunity to treat it in a localized manner. I don't think I need to go into much detail on how chemo and radiation affects a person, especially in the dose levels I received. I was given a list of items from my radiologist and oncologist, like getting back any sense of smell, regenerating my taste buds, getting rid of the aches in my muscles and joints etc. that they said would take at least 2 years to make progress in because of the significant treatment levels I received. I have strong faith, as my wife and I are ministers and I faced the challenge with the strength the good Lord gave me, but I can't deny the physical and emotional toll that it all took on me. In May, I began taking a product called MaxGXL. It was sent to me by my sister, who was battling her own war against primary liver cancer. I had pretty immediate and significant results. My energy, and sleep were greatly enhanced. People began to comment about how good I looked. And as of a few weeks ago, that list I mentioned earlier, well I've checked off the big stuff. Even my doctors are amazed at my progress. I know that God was the driving force in getting this product into my hands, but I thank my sister for being the vehicle he used!

CANCER & ILEITIS & LYMPHEDEMA & CROHN'S

Xarhis, Improved Cellular Function and Anti-Inflammation I am absolutely excited about this glutathione supplement because it helped me with two major health concerns: ileitis and lymphedema! The ileitis inflammation was located in the "terminal ileum" (area of the small intestine) just before the ileocecal valve to the large intestine. Apparently, this condition started some months prior from food poisoning. Over a period of months and delays in getting a correct diagnosis, I began to experience ongoing significant pain in the lower right area of my abdomen. It got to the point I literally could not sit, stoop, bend, wear tight clothing or walk without PAIN! Certain foods began to bother me, as well. The only way to get relief was to eat bland food, wear a robe and be in a reclining position. Finally, I had a CT scan that showed "thickening" in that area

attributable to infection and inflammation. Upon seeing a specialist in gastroenterology, I was given an antibiotic for the "infection" (presumably, caused by an amoeba), but was told the "inflammation" would take a "long, long time" to heal. In fact, the specialist informed me that since this condition had been left that long, he believed this thickening could very well already be ulcerated putting me at risk for **Crohn's** disease. The recourse for that would be surgery or Prednisone. I wanted neither. I was encouraged to have a colonoscopy after the antibiotic. However, I postponed this exam because I felt 90 percent better and had "some" continued pain. I also had an Alaskan cruise I wanted to take two weeks later; and I was concerned about the risk of possible perforation by the camera used in the exam (in my mind) designed for a colon and not a much smaller ileum. All of this was stressful to me because in 1994 I faced the big "C" of cancer and I certainly didn't want to face another big "C" for **Crohn's** disease! I knew several people who had it and I didn't want it. Being into natural health alternatives, I started on chlorophyll capsules and concentrated whole leaf aloe vera. It seemed to help some, but I was still having pain and knew I wasn't well enough for me to believe I could make the cruise. I heard about the glutathione supplement and obtained a week's supply. On the first day, I noticed a lot of energy. By the second day, I began to have less pain and within days I was actually able to increase my activities. After only taking eight (8) packets of the supplement, I saw my physical therapist for a scheduled manual lymphedema massage. (During my bout with breast cancer, I worked with natural herbs in lieu of chemo or radiation and my cancer was gone, but I was still left with **lymphedema**. My surgeon removed auxiliary lymph nodes, although I was assured they would not be.) My therapist, within a few minutes of putting her hands on me, asked excitedly, "What are you taking? What are you doing differently?!" The glutathione supplement had reduced some of the swelling from retained fluids and it softened much of the tissue that was usually hardened by trapped fluids from adhesions that would often take the therapist 20 minutes just to soften it. Immediately, she noticed my tissue was different. Never had it been like this during all the eight years she treated me, nor when I had taken chlorophyll or aloe vera in the past, so, it had to have been the glutathione supplement! (By the way, my lymphedema is still improving and I feel like I'm getting my life back.) After only 14 packets of glutathione supplement, I also knew it had significantly helped my ileitis condition. There now was no question about packing for the trip! I was able to drive ten hours the first day toward Canada for the cruise, with no problem. Just two weeks prior, I still could not sit more than a half-hour without experiencing some level of pain. I made the cruise and handled it fine: sitting, walking, climbing stairs, dancing, wearing my pretty "tight" clothes, eating whatever I wanted now (gained 9 pounds) and had no problems whatsoever! Upon returning home, I took only four packets of the supplement (making it a total of 18 packets) before my scheduled colonoscopy and "knew" even before the exam that I was fine ---- and I was! The specialist took the camera into the ileum and it was normal.

CHEST PAIN

Carvel - I am 66 years old. Using the glutathione supplement has changed my life. Yes, I have reentered life! I experienced a significant benefit within 2 hours of using this product. I feel better now than I have in many years. Here is my story. I was in near perfect health, so I believed, through my late 50's. Then I was assaulted by serious mental and physical health challenges. I had been an outdoor enthusiast. I ran my first marathon at age 47. I ran at least one marathon a year for 10 consecutive years. I did a lot of mountain biking and backpacking into the backcountry. Also, I snow skied ---- never at a high skill level, but I had the energy and strength to do it. All that great outdoor stuff stopped when I became ill. I stopped exercising and gained 75 pounds. For several years I was not living life ---- I was merely surviving from one day to the next. I was diagnosed with severe depression and an anxiety disorder. Every day for at least 5 years, I had pains in my chest; some days it was only at an uncomfortable level, but most days the pain was excruciating. I was committing many thinking errors. It adversely affected every area of my life, including financial, spiritual, and social. Nothing seemed to deliver relief. I was hospitalized 3 times. I sought help from several different medical doctors. Many different pharmaceutical medicines were prescribed and used. Still no relief. I tried several

alternative approaches to my health problems, including acupuncture, hypnosis and chiropractic. Nothing worked. I spent a week with a holistic practitioner in Mexico. It didn't help. Many well intended people gave me advice – what to do – what to eat – what to drink – what to swallow, etc. Nothing worked. I decided to take an early retirement. I retired from my career in 2003. **Life was still very hard.** Then I decided to move from Utah to Hawaii. I made the move early November, 2006. I believe that helped, but I was still hurting. I woke up every morning with turmoil in my chest. I can best describe it by reporting that it felt like cats inside my chest clawing. Sometime late December, 2006, I learned about glutathione supplement. I began using it mid-January, 2007. This is what happened. Within an hour or two after I first took the supplement, I felt softening of the anxiety in my chest. The pain went away, and has not returned. It is an absolute miracle. But the softening of the anxiety per se, is not the most miraculous part of my experience. Not only was my anxiety going down, but my energy was increasing. Never before had I taken anything, good or bad, that increased my energy and also reduced the anxiety. Usually when my energy increased, my anxiety cranked up. So, my first two noticeable benefits were my anxiety reduced and my energy went up.

CONSTIPATION

Jeremy Foss, Jacksonville, FL -A good friend of mine so graciously offered me a one-week sample pack of MaxGXL back in January 2008. Prior to taking MaxGXL, I battled **chronic constipation** ever since I was a child and had to resort to enemas and laxatives at times. It was very uncomfortable. We all know that is not healthy, and always in the back of my mind was "I know this is unhealthy, and I sure hope I don't get worse health problems from my constipation." I am now 31 and I was still only going about once per week until MaxGXL came along. The first few days on the product, I noticed my energy levels had dramatically increased, and my mental clarity which allows me to think more clearly and give me mental focus, also improved dramatically. I also noticed within the first few days I was much more regular. Needless to say I have been detoxified among other things and this amazing product has cleansed my body "literally." After being on MaxGXL for over 3 months now, I have lost 15 pounds, I look and feel fabulous! And yes I am regular again, too. Thank you, Dr. Keller and thank you Max!

DEPRESSION

Zack Colman, Tempe, Arizona - I am a Junior at Arizona State University in the Graphic Design program. Since I can remember, I have always had a tendency to depress easily and dwell on the negative side of things. Graphic Design is my passion and I love what I do, but earlier this year, it really threw a curve ball at me. In February of this year, I along with my fellow students, had to re-apply to the upper division portion of the College of Design. Only some of us would be accepted and it was an intimidating experience for most of us. My mom took out a large loan and bought me high-grade equipment that I would need, upon acceptance, to complete my course of study. As the semester drew to a close, I needed a certain grade point average and standing in order to even have my application considered. At this point in my studies, we don't take tests, but have to professionally and impact fully present our design work in front of heads of the departments at ASU. My presentations were scheduled for May 1st and 2nd. On April 30, I came home to pull all my work together for the presentations, only to come home to find my house had been robbed. All my equipment AND thus my WORK - GONE! I felt like my entire future had been flushed down the toilet! I didn't see any way I could overcome the hand that had been dealt to me. It seemed hopeless. But I didn't give up, and over the next 48 hours I worked my tail off. During that time, my mom pumped me with MaxGXL. She said it would help with my energy, my focus and clarity and help me deal with the stress of what I was facing. She was right. On less than 5 hours of sleep in 48 hours, I pulled it off. According to her I even had a lilt in my step and a twinkle in my eye! I received my letter of acceptance to upper division in July and am now pursuing my life's dream. I know that Max GXL played a major role in helping me face that insurmountable challenge.

DIABETES

Gary & Sally Newton - "I have **Fibromyalgia**, Osteo Arthritis, **Diabetes** and **Degenerative Disc** disease. Most of my issues have been passed down from my parents. From the 3rd day of starting the Maxgxl I noticed an

increase in energy. After a week my pain level had dropped significantly. I was noticing my hands being more flexible and my knees hurting less. I have been able to increase my daily walk from a mile to over 3 miles in the 3 1/2 weeks since I started. I have so much more energy and my spirit and moods are GREAT! This has been wonderful for me to feel this good again. It has been 20 years since I have had the energy and joy I have now. With my pain level reduced I feel like smiling all day and have been able to reduce 2 med's for my pain and stiffness and 1 med for my Diabetes. I notice that I can think more clearly and I feel 20 years younger. I had bunion surgery on my foot just before I started the MaxGXL. This was the 2nd time I have had the surgery. My recuperation time was cut in half. I was back in shoes in 3 weeks and it was 2 months before I could wear a regular shoe the first time. Amazing! * My husband is a contractor and has used his body hard for 45 years. He has been on the MaxGXL for the same amount of time as me. He calls them his "happy" pill. He has had much less pain in his hands and knees since he started GXL. The main thing he noticed is that he used to be in bed by 8 at night and sleep thru the night till 7 AM. Now he is able to stay up later and wake up refreshed earlier in the day. The stamina he has received during the day has been amazing. He used to come home at noon and have to take pain med's and a nap during lunch. He now plays with the Grandkids and takes no pain meds. Some of the side effects of his Diabetes medicines have been reduced as well since he started taking MAX. He loves the good feelings and never misses a dose. We are truly living younger and stronger with the MaxGXL. We feel as we continue to take the Max we will be able to reduce our Med's even more. Thank you for giving us our joy and health back!"

Dave, Glendale, Arizona - I am a type one **diabetic**, having suffered from the disease for decades. My treatment cycle required at least 4 insulin injections a day. I began taking MaxGXL at the end of May 2008. By the end of June my insulin requirements had dropped to one shot a day and by mid to end July I was able to discontinue regular injections. Only a diabetic can understand how life changing this is. My energy level has increased dramatically. I've lost almost 50 pounds and I don't hurt like I used to. I am dedicated to MaxGXL

Ken, Airdrie Alberta, Energy, aches and pains. I started taking Max products beginning in February of 2012. I'm 41, drive truck (delivery driver) and am a shop hand for an oil company. After only about a week of taking Cellgevity and Max-n-Fuze, I started noticing differences in many aspects of my life. First of all, for years, my eyes have been very dry and sore for years and I was always using eye drops and within a **week my eyes were no longer burning** and I could actually **see clearer**. I never use eye drops anymore and my eyes are no longer dry or sore.

Secondly, I'm up early (5:15 am) and was needing to have a nap after work just to stay awake until our 3 kids (9,6 and 4) were ready to go to bed at 7:30. That is no longer the case as I have **lots of energy** and don't need to go to bed as early or have a nap anymore.

The third improvement I noticed was **aches and pains** in my body. My right knee has been sore for as long as I can remember, I tore my MCL in my left knee, severely separated my left shoulder, and have had arthroscopic surgery on my right shoulder (torn rotator cuff and torn capsule) as well as a severely sprained right ankle. Needless to say, I had many aches and pains and used to take glucosamine to alleviate the pain. I stopped taking that before taking any Max products to get an accurate account of how the Max products were helping. I now have virtually no joint pains and don't take anything but Max. The fourth thing I noticed was my sleep patterns. I no longer wake up multiple times at night and actually dream now. I'm not tired when I wake up anymore, dreading having to go to work because I don't have the energy. Taking Max really has changed my life for the better as I can now do things that I was always too tired, or too sore to do. I can go bike riding with the kids or do other activities and don't complain about being stiff and sore or too tired. I feel much younger, and have so much more energy that I can't believe it. Just as a footnote, I never really believed in taking vitamins or supplements before my Max experience but will never be without Cellgevity and N-Fuze now.

FATIGUE/ENERGY

Helga – Calgary, AB - I am a mother of three girls, 5, 3 and 19 months. My husband is gone about 80% of the time due to work obligations. I often feel like I am “single-parenting”; rarely do I get a break. Between the three kids, I am usually disturbed at night a least half a dozen times. To say I am sleep deprived is a bit of an understatement. I often tease and say I feel like I am in a bit of a foggy, drug induced state!

When Trish brought me a months’ supply of Max just before Christmas, I was not only dealing with the fatigue and brain fog, but I had a serious muscle cramp in my neck and shoulders which had been bothering me for months. After only a week of being on Max, I was surprised to find that I wasn’t ready to drop into bed at 7:30 after the kids were in bed. My mind was alert and my body was not exhausted. The tension ache in my neck and shoulders was eliminated and I found I had energy throughout the day like I had not experienced since having kids. I also noticed that pain in my foot due to a fallen arch lessen considerably.

When my months’ supply ran out, the fatigue hit me again with a vengeance, mind clarity has again gone “foggy”I can’t wait for my order of Max to arrive so I can once again feel like a person truly alive! I have been telling everyone I know about Max – I am convinced it is a “missing link” in many of our health pursuits.

Shirley - MaxGXL has given me back my energy. Last fall (Aug 07) I was in the hospital in ICU for 11 days, diagnosed with sepsis (bacterial infection of the blood - which also feeds on the muscles). I did weights and walked, but I always felt like my body was sleeping no matter what I did. It has been a long year of trying to recover my strength and energy. Three weeks ago I was introduced to Max GXL and after taking it for only 3 days I started sleeping better and every day I wake up refreshed and ready to get up at 6 am. (I have always been a morning person, but this past year I would get up at 8- need a nap by 10am and another one at 2pm and I was ready to call it a day at 8pm). Now I am up until 9:30 and seldom take a nap. As I continue to take GXL I am noticing other things with my body, but nothing as defining as the energy I now enjoy."

Sandy - "Since taking Max, as I call it, I have since been filled with **more energy** and am walking approx 3 miles per day, since Saturday of this past week!!!!" It is a miracle, as I have not had any strength, to barely take my bath, and wash my hair , apply my make-up, and then have to rest, in between each of these normal daily tasks...so I am sharing the honesty and from the bottom of my heart, a truthful testimony, and that I am regaining my life, and I give the major credit to Max products you have so generously started me on. There are not enough words, or even anything I can do in return, but if you need anything from me, please do not hesitate to ask, as this has given me a second chance to live my life productively, and also, my PAIN IS ALMOST NON EXISTENT!!!! Again, you are both forever in my Heart, and Prayers of Thanksgiving, and I am speechless to say anymore than what I have shared with you here in this short, heartfelt email. thank you so very much, and you have to know this is life changing for me, as i had almost given up hope for my life, and with a new grand baby on the way, I now will be able to keep up with all of this bundles needs, in helping my precious daughterthere is no money in the world that could measure to what this means and has done to change my destiny!!!!"

Allison Fleming - I am 50 years old, married, mother of two boys and a first grade teacher. I’ve had some serious **fatigue** issues and on June 5, 2007 I had hip replacement surgery. Something went wrong during surgery and after 8 months on a walker and many more months using a cane I finally began to be able to walk on my own. I have never stopped living in discomfort. I was able to continue working, but by the time I got home each day all I wanted to do was sit. It was so difficult to get out of my chair just to walk across the room that I usually stayed there most of the day. When I did get up I could only shuffle-walk down the hall. I didn’t want to do housework, cook, or go anywhere at night. About the only time I went out at night was to go to church. I was constantly praying and asking God for help. I began swimming a mile a day because being in the water was the only place I could be and not hurt. In November of 2008, the mother of one of my students brought me a small red box of MaxGXL. She asked me to try it for one week. I took the product for 3 days and thought I was feeling better, but got a virus and stopped taking it. A couple of days later I began taking it again. I thought I didn’t seem to have as much discomfort. So I got another box of MaxGXL and took it another week. I couldn’t believe how much better I was feeling. I have been on MaxGXL for three months now and it is unbelievable how I feel! I have my life back. I have been going out at night, shopping, and walking without

discomfort. This Christmas we went to the mountains with my son who had just returned from Iraq. I was able to go bowling, play putt putt golf, and went to Dollywood. I am also going on a ten-day mission trip to Odessa Ukraine in July. If not for MaxGXL this would not have been possible. I have recently begun taking Max WXL and lost 8 pounds in 16 days. I have been trying to lose weight for a long time and I know that this is the answer to my problem. I can't wait to see what this has done for me in 6 months. I know if I had not been introduced to MaxGXL I would still be sitting in my chair and wondering what kind of future was ahead of me. I am walking proof that MaxGXL gave me my life back and I will do my best to let everyone know what an awesome product MaxGXL is and how it can change your life.

Remko Y - "I myself have noticed an **increased level of energy**, less tiredness and a solid **sleep** after 9 hours at work and 4 hours working at home; a definite positive impact. I am taking 3 packs a day. MaxGXL works for me!"

Tom Colman, Chino Valley, Arizona - For the last few years, I have been lamenting about being in my 50's and complaining about what growing older steals from our everyday lives. Believe, me energy is underrated! I started taking MaxGXL in August of 2008 and wow, I feel years younger. My energy level is so increased I feel like I'm 30! The energy could more accurately be called an increase in endurance, because I can work all day, in my yard, doing manual labor, and in the evening still be raring to go! I've lost over 30 pounds and my focus and clarity have really increased. I can do more, and I can make better choices. It's not just because we are getting older . . . there are answers out there to improve our quality of life, even in our later years. Thanks Max!

Wanda Bacus, Chino Valley, AZ - My **energy level** increased dramatically within a matter of days on the product. I can't believe the difference in how different I feel!

Margaret Lester, Chino Valley, AZ - I started to take MaxGXL at the end of May 2008. I immediately noticed an **increase in energy** and mental focus! I feel like I am much better balanced both physically and emotionally! It's great!

FIBROMYALGIA

Joanne - I am 61 years young --- feeling like I'm 39 and holding due to the glutathione supplement! I can think more clearly now (less senior moments), major pain nearly gone --more energy. I love to dance and there is no more lactic acid after dancing or exercise! Inflammation is the cause of almost all pain but with the glutathione supplement and my positive attitude, I am experiencing major pain relief. But my life wasn't always this enriched --- healthwise! I was diagnosed with **fibromyalgia** and **osteoarthritis** back in the late '80's --- early 90's. I have been in pain since that time! **Fibromyalgia** is a condition where you hurt all over your body. I would take over-the-counter pain medicine to help with the pain ---- but it would help for a short time only. My doctor gave me antidepressants a few years ago. I told him that I wasn't depressed. He told me that antidepressants work for the pain of fibromyalgia. So I went home and tried it. I took one tablet ---- a few minutes later I was sick to my stomach. I threw the pills in the garbage. So over the years I put up with the pain, dealing with it as best I could. Due to this condition, I only slept 3-4 hours a night as well. And we all know that as we sleep --- our bodies are repairing themselves. A person needs their proper sleep or they can't function the next day! But since learning about the glutathione supplement --- I've been taking it since July 9, 2007 noticing AMAZING RESULTS within 48 HOURS! First of all, I noticed my pain was not as bad as it used to be --- my arms and legs had a lot less pain. As the days went by, the pain got even less! I have a great sleep every night now and energy galore. An amazing supplement!

Here are some other benefits I noticed:

Better sleep – that is, more restful slumber
Natural color returning to my hair
Old scar tissue on my right shin repairing
Increased desire to accomplish things each day
Increased sense of well being

I do not use any prescribed medications. I feel discouraged sometimes, but I no longer suffer from depression; I know the difference. Yes, using this product has changed my life. It is true that I feel better than I have in many years. I am not yet back to the point to where I thought I was enjoying near perfect health. But, that is now up to me. I know I need to exercise more, and **shed some pounds**. There is more, but I think I have captured, and shared the essence of my experience using the revolutionary product.

CAZ – Calgary, AB October 22, 2009

A little over five years ago I became quite ill. An overwhelming feeling of exhaustion coupled with poor concentration and aching pain everywhere. At the time my doctor and I were not aware of Fibromyalgia. In hind sight we now realize I had been misdiagnosed. I was away from work for over nine months. The drugs that had been prescribed for me actually resulted in me barely remembering at least six of those nine months I had been in such a fog.

In the summer of 2007 my symptoms had returned and were progressively getting worse. By January 2008 I was once again off work on sick leave. Both the Neurologist and my Physiotherapist determined that in fact I did not have CMV, but did have **Fibromyalgia**. When I went back to my doctor with this information she proceeded with tests to ensure this was in fact the case. I was actually relieved to learn I did not have CMV after all, it can lead to death. So to me Fibromyalgia was the lesser of the two evils.

Then we started the medications. I was taking Cesamet Nabilone for the pain; it worked great but made me 'stoned' and gave me the munchies (I gained 20 pounds and I'm only 5'2"!); it is actually capsules of medicinal marijuana. We have since limited this medication to bedtime only; it definitely helps me to sleep at night. My doctor then had to find another medication I could take for the Fibromyalgia pain. Cymbalta then became available in Canada; although originally for depression there had been findings that it helped people who had **Fibromyalgia**. It does not take the pain away nearly as well as the Cesamet Nabilone; but my mind is clearer and the pain is tolerable. Sadly the side effects I am experiencing with the Cymbalta are not pleasant and can be somewhat embarrassing. Still tired all the time on this medication and I feel weak; a real lack of body strength.

Then a friend of mine told me about this nutritional supplement that was now available in Canada. It is manufactured in North America and it would improve my life. At first I thought that (a) I eat well (little if any processed foods, my husband and I enjoy cooking and baking from scratch) and (b) I take a multi vitamin, cod liver oil and vitamin D every day. What would I need a nutritional supplement for? I must admit I didn't take her too seriously at the time.

Several weeks later my friend invited me over to review some information on this product. She is a good friend so I agreed to come over. After viewing Dr Keller's video and some discussion I decided to give it a try. I felt that if only 10% of what I learned that day was true, then I would consider this product a miracle drug; however she reminded me that it is NOT a drug but is a nutritional supplement! Dr Keller had found a way to get MAX GXL capsules thru the gut and to the cells. Have you ever taken that red / orange / green vitamin pill and notice your urine is the same color as the pill an hour or two later? This would be a miraculous breakthrough if it were true!

On August 31, 2009 I started taking MAX GXL; one packet in the morning and one more packet at lunch with a glass of water. By day five I was already noticing a difference, I couldn't believe it but I was sure hopeful. Anyone who has Fibromyalgia knows that you may get a day or two here and there that is tolerable, but to feel GOOD, WOW! Sadly I crashed the next day, slept from 10 PM until after 1 PM the next day, I hadn't slept that long since I was a teenager (FYI- I am 55 now)! I decided to reduce the amount of MAX GXL I was taking from 6 capsules a day down to 4 capsules a day. I have stayed with the MAX GXL at this dosage throughout. By day 21 I was feeling GOOD! The next day rained and I didn't hurt, that was the first time in two years that I could say that! There was some detoxifying I went through; Glutathione helps in cleansing your body and acts as your defense mechanism, so this is to be expected. By day 29 I decided to try to reduce my Cymbalta medication, the side effects and the fact that Cymbalta is not covered by my drug plan is reason enough to

want off of this medication, I now only take it every other day!

The differences I am experiencing are mind boggling! :

- I have **energy** again.

- I no longer need to nap every day.

- I have always been plagued with dark circles under my eyes (bags) and they are filling in for the first time in my life!

- I have had only one **headache** in the last month (I lifted something that was too heavy – don't push yourself like I did, I still need to work on my body strength).

- I have been able to reduce my physiotherapy and massage treatments to once a week from a high of three times a week.

- **my skin is getting so soft and wrinkles and fine lines are disappearing.**

- some of that weight I gained is starting to drop off now (even the kids noticed!) that I can go for walks again (start slowly and build up the distance and speed of your walk, remember don't push it).

I could go on but by now you can tell that MAX GXL has given me HOPE for a brighter future.

Thank you LM for introducing me to MAX GXL, I now have hope for the future. Thanks to MAX GXL I am so much happier and healthier. I still have a long way to go; but now there is a light at the end of the tunnel. I have decided to hand in my Retirement Notice (I am a Financial Planner with a major Canadian Bank) and am now an Associate with MAX International. I have a future again,

Giselle - I was diagnosed 7 years ago with **fibromyalgia**, I couldn't do anything, I was in so much pain the specialists and doctors were giving me all kinds of pain killers to try and help me, but the pills didn't help much. Last year a new treatment for **fibromyalgia**, similar to chemo therapy was offered to me called lidocaine. When they first gave it to me i had to go to the hospital for 8 hours to receive the lidocaine treatment. lidocaine is what the dentist uses to freeze your mouth before they take a tooth out. They changed the treatment to a 1 hour session but I didn't feel better at all, it made me sick and I lost some of my hair. I started taking a supplement called Maxgxl November 21, 2008, now I take only Maxgxl, What a difference! I feel 100 % better now. I have **energy**, I **no more migraines**, my bones, skin, nerves, muscles and joints are not aching any more!!! I live my life to the fullest now. I'm able to sleep very good now that I am **pain free** and I **lost 28 pounds**. My whole body is getting detoxed by Maxgxl and I feel like I'm 20 years younger. I'm 46, I have 2 children and 8 grandchildren, so yes, I'm running around a lot. The people that new me before are all amazed at how good I look and feel. I can go dancing now and have fun again. I'm so happy I found Maxgxl, I call it my miracle pill. Maxgxl has no known harmful side effects; ** Maxgxl in a double blind, placebo controlled, cross-over study was proven by blood tests, in only 60 days to work 100% of the time for 100 % of the people

HEART

Dan, Arizona - I am in my late 30's and have **heart and lung problems**. The first thing I noticed was I could breathe deep without sharp pain in my chest. Other things too. Sleeping better, and it seems like lots of my pains from old injuries are gone. I am now in my third month and plan to continue to improve. Life is fun again.

Michael Unclebach, Sherman, TX - During the summer of 2007 I was training to run a marathon in the fall, when I underwent what I call the "bad day". After being rushed to the hospital with symptoms of an irregular heart beat I ended up in the cath lab where a heart cauterization procedure was performed. Turned out I didn't have a heart attack, I had an irregular heartbeat and ended up with a pacemaker. After two days in the hospital I went home to recover. After two weeks of rest I was released to return to physical activity such as running so I called a buddy and we went out for a my post pacemaker run. After just a couple hundred yards I knew something was wrong. My right leg just wouldn't work, I was literally dragging. So I went back to the hospital where I was diagnosed with having a blood clot from the **heart** cath procedure. After several rounds of blood thinners and no relief, a second procedure was performed to try to reopen my right leg. When that didn't work I went to see a vascular surgeon who diagnosed an allergic reaction to the plug device that was used to seal the original heart cath procedure. It took two weeks to get to the vascular surgeon to clean out my artery and restore proper blood flow to my right leg. I went for two weeks with extremely diminished blood flow to my right leg, causing severe damage. As my doctor put it "**your right leg has just undergone a stroke.**" I

was sent home to rehab my damaged leg. My first workout consisted of a three minute walk with a limp. After three months of rehabbing my right leg I was up to an 11 minute walk/jog with a limp. I was pretty discouraged. Then I got a phone call from Rick Teague who called and talked to me about MaxGXL. I guess he was moved by my story and sent me a one month supply of product. After just ten days I ran for 20 minutes, after 30 days I ran for 30 minutes, after six weeks I ran for over an hour. Believe me, I had tried everything before Max showed up and nothing seemed to work! MaxGXL gave me my leg back. Thank you Max, and thanks Dr. Keller. With great appreciation . . .

David Brent, Chino Valley, Arizona - I experienced a heart attack prior to starting on MaxGXL. I was having a hard time with my recovery and having been taking a substantial amount of medication. After being on Max for a few months, I had an overall checkup by my doctor. It was a funny day when I went in for my follow-up on the tests. My doctor kept looking at the test results and saying "wow, this is really good" then a few minutes later he would do it again, and again. He was stunned at the change in my health. Since taking the GXL, my dependence on the medication has dropped substantially. I have more energy to work my day job plus two side businesses, and never poop out! My moods are better (according to my wife) and I am more relaxed in social situations. What an impact Max has made on me!

Serge, Age 46 Back in 2005, I suffered a **heart attack**, three weeks before my 44th birthday; I remember thinking, "What's going on? I'm too young for this!" But it did happen. Since then, I was plagued with chronic fatigue, heart palpitation, headaches and more. I started taking the glutathione supplement last spring and after 3 days of taking it my palpitation had ceased. Then one week later my fatigue was gone and so were my headaches. But on thing I did not expect. Since I was very young, I chewed my fingernails (I was always a nervous child) and one day, after about 3 months on the glutathione supplement, I started to notice fingernails growing for the first time in 40 years. My stress levels had gone down so gradually that I did not notice that I did not chew my nails in a few days, and have not had the urge to chew my nails since then. I've also noticed my E.D. as a result of my heart attack had also been Corrected. My sleep patterns have also been much better, as well as my mental focus.

INFLAMMATION

Lisa Bishop – Calgary, AB - I have been taking Cellgevity since December and have noticed a remarkable improvement in the inflammation in my knees and ankles. I have also suffered all my life with muscle cramps in my calves and feet. Since taking Cellgevity the cramps have decreased by at least 80%. Cellgevity has also improved my sleep quality. Thanks Cellgevity!

Jackie Brent, Chino Valley, Arizona - Before I started on MaxGXL, I had **tremendous pain in my legs**. My knees and lower legs were always swollen and walking was uncomfortable enough; but getting up the stairs took a huge effort and going down the stairs I clutched the railing for support, and was always fearful of falling! In just a couple weeks on GXL both the swelling and pain diminished. Now I rarely swell, and if I do, it is gone by morning. You can't imagine what the diminishment of pain has done for my quality of life along with the increased mobility. After a month on the product I could walk up the stairs without pulling myself. After two months on the product I could walk down the stairs without event holding on to the railing. What a gift. Add to that the extra energy and focus that the product provides which helps me handle working from 3:00am to 9:00pm almost daily between my job and two side businesses and it is easy to see just how much my quality of life has increased!

Linette Milligan - I suffered from daily discomfort in what I refer to others as my "chicken bone," you know, the shoulder blade. I like to describe it as the housewife's discomfort from the continuous day to day chores of laundry, making beds, dishes, sweeping, vacuuming, laundry, cooking. It was VERY severe. I used to beg my husband to rub my shoulder area. Then once he started, I would beg him to stop because it still hurt. After a week of taking MaxGXL, I noticed the discomfort was gone—like it never existed. To top it off, I NEVER get sore any more after my workouts. Even on the days I work out extra hard I think to myself, "man, I am going to be hurting so bad tomorrow." But much to my surprise.....NOTHING! I love MaxGXL! Not only for what it has done to my body, but for what I know it is doing to protect my body in the future! And I got an added benefit: I sleep

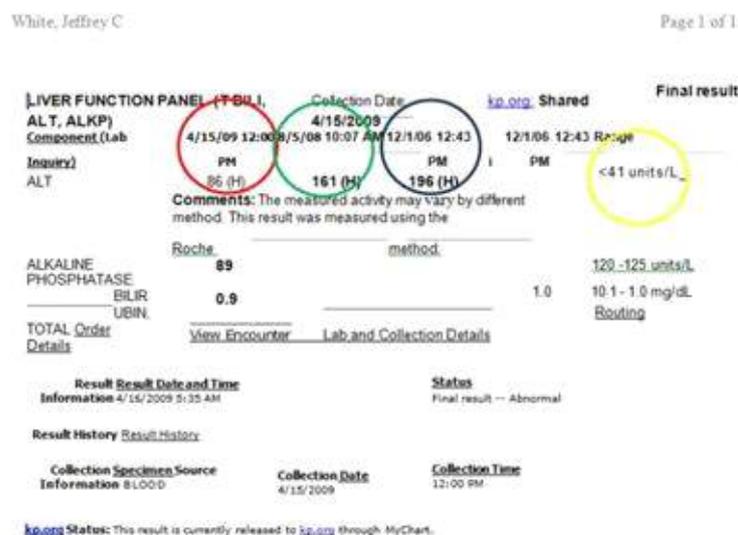

so great now. I wake up feeling so crisp and energetic. Thanks, Dr. Keller!!!

Shirley, Improved Cellular Function - About three months ago, I had problems with my joints bones and muscles, I wasn't very good company. I felt old, much older than my age. I couldn't walk upstairs or hills. Just standing after sitting for a while would give me excruciating pain. I never felt good about anything in my life for about 10 years. Although I was skeptical, I started taking the glutathione supplement. In one week, I started to notice little things, like going about the house humming. The first time I caught myself humming in the morning before coffee, WOW! Then I was walking upstairs without stopping halfway or on my hands and knees. Now I feel so good I can walk up a hill, that before I would have had to stop three or four times before reaching the top. Now I just keep on going without getting out of breath or feeling any pain whatsoever. I would recommend the glutathione supplement to anyone, at any age. **I am now 68 going on 45 or 50. Before I felt like 68 going on 80**

IMMUNE SYSTEM

Wayne Elloy, Retired 65 years old - I have felt great every day! GXL could be the secret to protecting us from viruses our body is not immune to. I have my parents and my Grandma on it because the government has already released a statement that they will not treat anyone over the age of 50 (or under the age of 2) for the Avian Flu when it reaches the US. They will need to fight this off themselves. Health of our families is the most valuable (earthly) thing we have. This really is incredible .

LIVER

Jeff and Denise White - My liver has improved because of taking MaxGXL. See proof above from Kaiser, my medical provider. I started taking MaxGXL in October 2007. I began a regular exercise routine some time in 2008. My family and I continue to enjoy all of the Max products! Thank you Max!!!

MACULAR DEGENERATION & ITCHY SKIN

Kay, Improved Cellular Function – Burnaby BC I am almost 96 years young and live in Burnaby, British Columbia, Canada. Since starting on the glutathione supplement about seven months ago, I have had a number of positive changes, but for one in particular, I am most grateful. For several months I had been having a problem with my right eye being sore and “fuzzy” and I was using drops several times a day. I was afraid I was losing the sight in that eye. An eye doctor told me I had **macular degeneration**, confirmed later by an eye specialist. Neither he gave me any positive help. Three days after starting on the glutathione supplement, I looked in the mirror and was surprised to note I could see a “little bit” better. After eight days, I

was looking out the window and could not believe how well I could see, and couldn't remember when I had stopped using eye drops. That is the way the supplement works --- all of the sudden you notice a positive change in problems that you were just living with as part of life. For example, itchy skin disappeared after many years, my hearing is a "bit" better, and I'm sleeping better. My right foot had intermittently been very painful. It was thought to be gout but recent blood tests showed it was not. Although the pain had gone, I had swelling and inflammation. One day I noticed that was gone. I also had shooting pains in different parts of my body, especially at night, but recently noticed they have disappeared. My energy level is great and at almost 96, I am living a very happy, healthy and active life. I have invitations out for my 100th birthday!

MIGRAINES

Laura Colman, Glendale, Arizona - For the last couple years I have been having an increased experience with **migraines**. I would have 7 to 10 a month and they were totally debilitating. I was very light sensitive and would get extremely nauseous as the pain pounded in my head. I literally would have to close myself in a room and lose a day of my life! I was consuming ibuprofen at an alarming rate, which caused me additional worry about the health of my liver. I was introduced to MaxGXL and everything has changed. **Migraines** no longer run my life. It is rare that I ingest a pain reliever at all anymore. If I feel a migraine coming on, I take an extra dose of GXL and within 20 - 30 minutes all essence of it is gone. Unless someone lives with pain, they don't understand how negatively it impacts your quality of life. Thanks Max!

MULTIPLE SCLEROSIS

"My name is **Mickey Branum** and I'm a 52 year old female living in Midlothian, Texas, which is just south of Dallas. I have had Multiple Sclerosis for 30 years. Initially doctors didn't know what was wrong with me since all the tests they ran indicated everything was normal. However, my body was still getting numb; I began to not be able to move my fingers very well and they started to curl up. After a couple of months of seeing different doctors and taking all kinds of medications, I began to not be able to hold a brush in my hand, to not be able to sit up and then one morning to wake up and fall flat on my face in my hospital room because my legs no longer worked, my neurologist decided to give me high doses of steroids in my I.V. After a few days I began to get the use of my hands and legs again, but my body remained numb all over. After the MRI machine was developed in the early 80's, I was officially diagnosed with relapsing/remitting M.S. Over the next 20+ years I would have strange symptoms with my body which would either clear up in 2 to 3 days after taking steroids or in 6 to 8 weeks without steroids. *However, in 2000 my episodes became more frequent and steroids no longer worked to give me the ability to walk without a cane. I had taken a M.S. drug, Betaseron, for several years with no results and my doctor had even noticed my body was getting weaker and weaker, especially on the left side. In October of 2000 my diagnosis was changed to progressive worsening M.S. My neurologist started me on Novantrone (a type of Chemo treatment) which I took with no results whatsoever. Several years later another neurologist started me on Cellcept which is a prescription drug taken by people with an organ transplant. Cellcept did not improve my symptoms but it seemed to level me off in that my symptoms did not get worse. I have had to walk with a cane, a walker or a scooter for the past 7 years and have taken prescription meds to help my muscles relax as well as to help me sleep at night - which only gave me 2-3 hours of sleep if I was lucky. *

In January of 2008 a friend down the street told me about MaxGXL. After she had taken it, she no longer needed back surgery. She had read information that MaxGXL was good for people with **MS**, was a great antioxidant and helped the immune system. My doctors had always told me to eat, drink or take anything that helped the immune system or was an antioxidant. I had already tried the berry drinks and didn't have any results with them, but I'm always willing to try anything that might help my symptoms, especially if it is a natural substance and has no side effects. *After taking MaxGXL 3 days, I was sleeping all night (7-8 hours), had energy all day long and didn't notice any muscle tightness even if I had not lain down during the day. I felt great and was walking longer with my cane instead of having to take breaks to sit down. I even helped my son and his wife paint the inside of their home and after sitting in the floor for several hours painting for two days, I was not sore at all. *After taking MaxGXL for about two months, I was walking in the parking lot of a store and began to notice my balance had returned and I no longer needed my cane. I had an appointment with my

neurologist a little over a week after I was walking without my cane and I told her about MaxGXL. She had always known glutathione was very important to the body, but cautioned me that other patients had tried "things" and initially had results which did not last. I had another appointment with my neurologist after I was still walking without a cane for almost six weeks and she was very surprised and pleased with the results I was showing after taking MaxGXL. Several members of my family are now taking MaxGXL and are having great results with problems they had from arthritis, sleeping, energy, knee problems, back problems, etc."

Frank and Judy, Improved Cellular Function Peachland, BC. - I am 46 years young. In 1997, we were hit with the news that I was being diagnosed with **Multiple Sclerosis**, a neurological disease which leaves little hope for the future. Our children were young teens at the time and needless to say this was terrifying for all of us. With MS comes many different types of symptoms, muscle pain and spasm, mental and physical fatigue, poor balance, I can go on and on. Activities had to be well planned so that I could be well rested. I hated feeling like a burden to my family. As things go over the next years so many well intentioned friends and friends of friends were convinced they could "cure" my **MS** with their various products etc. Being somewhat of a realist I didn't want any part of bouncing from product to product, I did my research, there is no cure for MS! In January of 2005 my husband had a heart attack, yet another blow for us! Two surgeries and 11 stints later he is taking huge doses of Lipitor (80 mg daily). Our children now being young adults and heading out on their own, I wanted a change for us so we moved to Peachland and semi-retired. In June of 2007 my husband was introduced to a glutathione supplement. I was willing to try it. About two weeks into taking the glutathione supplement, I had to admit that I was feeling so much better than I had in years! Less spasm, less pain, less fatigue and more energy than I had in some time! WOW and this gets better. After two months on the product, my husband's medication was reduced by 20% to 60 mg of Lipitor daily. Glutathione has been so much more than a supplement. It has and is changing our lives daily. I still have **MS** but **MS** doesn't have me! We are looking forward to a much longer life and a better quality of life than we ever could have imagined!

PARKINSON'S

Bob Schrader's - I had many problems associated with **Parkinson's** that I did not want to have people know about. It was a personal thing and I was in a deep depression until MaxGXL started to relieve some of the symptoms, I feel great now and I am ready to face the world as you can understand after reading my testimony. I was diagnosed about five years ago with Parkinson's disease. Contrary to popular belief, Parkinson's has more problems associated with it other than the visible shaking of the hands. There is pain. I had difficulty walking, both my knees were stiff and painful. I could only walk a block or so and then had to rest. I had problems sleeping, could fall asleep with no problem, but would wake up three to five times a night. =Some of my other problems associated with Parkinson's were: My inability to remember names, appointments, losing or forgetting my glasses and my cell phone. I found myself needing more time to do simple movements, I had coordination problems, I was speaking too soft or in a monotone, my face had a masked appearance. I lost interest in many things I would enjoy doing, such as going to auto shows, working on my car, so many of the simple and wonderful things I took for granted and were now lost to me. There are side effects of the medication which, in some cases is worse than the problem that is being treated. I tried going to Orthopedic specialists for my walking problem to no avail. They took x-rays, MRI's and could not find anything physically wrong. Then a friend told me about this product that was doing wonders for people and suggested I try it. I was on the product for about 4 to 5 weeks and it appeared that there was no change. I stopped it for about a week, the aches and pains returned. These aches and pains were gone, but I did not realize that they had disappeared when I was taking this product. Started taking the product again and slowly the small aches and pain disappeared. Then my wife and other people started telling me how good I looked lately. (On the product 3 to 4 months) Then I started to feel better, slow at first, started to have more energy and sleep better (now I sleep 7 to 8 hours per night, before I was waking up every 2 hours). One day I woke up, feeling more energy than usual and noticed I had a bounce in my walk. I then found that I could walk almost endlessly without any pain. The pain was completely gone in my knees. The other problems are slowly disappearing, my face no longer has that masked appearance, my voice is getting stronger, my memory is clearer, coordination problem is better. I feel as if I am 40 again with the **Parkinson's** disease on the back burner, flame set at low. The results are just wonderful. Imagine what it would feel like if all of your pain had disappeared. I also have more energy than I have had in years. The energy is there just as soon as I wake up

until the time I go to bed. The feeling is actually incredible, pain free. A person never really can comprehend what it is like to have constant pain until he or she experiences it. MAXGXL HAS GIVEN ME BACK MY LIFE !!!!

Jean - I am a 52 year old woman with **Parkinson's**. I was diagnosed in 2002, at the age of 47. My neurologist is Ali H. Rajput, OC, SOM, MBBS, FRCPC, of Royal University Hospital, Saskatoon, Canada. I was last seen by Dr. Rajput in December of 2006, when it was determined I could no longer work (I was a bakery manager at the time). This is a part of his letter to my family doctor. "Jean was examined 3 hours and 30 minutes after the last dose of Sinemet. There was a 2+ resting tremor in the left upper limb and 1+ resting tremor in all other limbs. There is 2+ postural tremor in the right upper limb and 1+ in the left upper limb. Her pronation/supination is at 2+ on the left side and 1+ on the right side, and heel tapping is 3+ on the left and 1+ on the right. There is 1+ rigidity. Her posture is stable; she is therefore at Stage 2 disability." I first started taking the glutathione supplement in late May 2007. I started with three capsules in the morning and three in the afternoon. I felt nauseated, weak, developed a headache, and broke out in hives. So I then started taking only 1 capsule twice daily for three days. Then I went to 1 and 2 for 3 days. I still did not feel really well. Then I went to 2 and 2. By day 10, I started to feel really good. I actually slept for 4 hours straight, something that had not happened in the last 2 years. By day 12, I was feeling great! My medication did not "wear off" in one to one-and-a-half hours like it usually did, but lasted 3 hours before wearing off! My pain level went from about an 8 to a 2. For the first time since about January of 2007, I did not have to use a cane to walk! What a wonderful feeling that was! There was no more Parkinson's shuffle, and the cramping in my left arm and leg was minimal. And instead of sleeping half the afternoon away, I only need about a 15-minute nap. I started taking 3 and 3 capsules on about day 30. The hives have gone away and no more headaches. **So, to sum up the first 3 months;**

- 1) My energy level increased (from about a 2 to a 6)
- 2) I sleep for about three hours straight and for a total of about 6 hours per night, whereas before, I was lucky to get a total of 4 hours per night.
- 3) My medications last 3 to 3-and-a-half hours instead of 1 to 1-and-a-half hours, resulting in:
 - a) Less tremors
 - b) Less muscle cramping
 - c) Less muscle rigidity
 - d) Do not lose my voice very often
 - e) Do not have as much trouble swallowing
 - f) Pain in joints is minimal (as opposed to all day)
 - g) Do not need cane to walk
 - h) Less depression
 - i) My thinking is a lot clearer, not so foggy in the morning
 - j) Panic attacks are less
 - k) I feel more confident in such things as my driving, going put alone, etc.
 - l) Overall, more "on" time than "off" time

In September, I felt the glutathione supplement was not working as well, so I started taking 3 \in the morning, 3 just after lunch, and 3 at around 4 or 5 p.m. This seems to be working well.

Marilyn, TX - Where do I start? I was diagnosed with **Parkinson's Disease (PK)** over 15 years ago, and according to my Doctors, I am in the last stage, which is state 5. Three months ago I could barely walk, was falling down a lot, shaking really bad, all of the usual symptoms of PK. Additionally I have had a plate with screws put in my back and have had Fibromyalgia for many years. The pain was daily and made me cry all of the time. I started 3 months ago after my son had done a lot of research into glutathione. Today most of my pain is gone, I am not falling down anymore, and most of my PK symptoms have been reversing. My Parkinson's Doctors all flipped and asked where they could get it and how much. Praise God. I can't wait to see where I am at 6 months.

PROSTATE

Richard, Lakeland, FL - I am 72 years old and feeling younger by the day. The main thing I am really excited about is

my Prostate problems which went away within my first two weeks. Why they've known about this for years

and has been kept from us is beyond me. Everybody's hurting with something. I am just glad I found out about this now. Go out and tell someone. Make their day

RESTLESS LEG SYNDROME

Linda Tenney, Chino Valley, AZ - Three years ago I fell off a bicycle and came straight down on my knee. My knee has caused me pain and swelling ever since. The first thing I noticed when I started MaxGXL was no more pain and

Pat Straub - "I started taking MaxGXL about 4 weeks ago. The first results were increased energy and a feeling of wellness. The next result, I noticed, was the **restless leg syndrome**, I had suffered from for several years, was decreasing. Now it is nearly gone and only happens once in awhile. This is wonderful because the worst time was at night. Consequently, I am now sleeping much better. I am really looking forward to the other benefits that will be achieved as I continue to live my life with MaxGxL. Thank you... for introducing my husband and me to this wonderful product. MaxGXL for life,"

Gertie Miles, Prescott, AZ - I would like to tell you my great results. I now am taking all three of the MAX products and love them all but in particular the one I started with and will NOT under any circumstances (in my control) ever stop taking is the GXL which is the Glutathione accelerator. My story is that I have had neuropathy in my legs and spreading to my feet for years, and fibromyalgia, both being very painful. The neuropathy has been so very painful that I was not able to get any sleep at night at all even after taking prescribed medication I found no relief. By the way the most recent meds I was put on were for **restless leg syndrome**, yes, this would help me sleep but did nothing for the pain or the problem. A friend of mine kept telling me about the GXL however, since it was from a network marketing company I didn't want any part of it due to some prior experiences. The pain was getting worse and since I was not getting good sleep I was tired, irritable and all the rest that goes with being sleep deprived. So, I thought, why not give it a try! Anyway, after one month of taking GXL I was completely pain FREE. I know that sounds hard to believe and had I not experienced this for myself, I wouldn't believe it. I have now been taking this product since June. I'm not only pain free but I have tons of energy, am in a good mood and enjoying life again. My sincere wish is for everyone to be open minded and not let PRIOR failures stand in his or her way from trying this incredible product.

Paul Lester, Chino Valley, AZ - When I was young, I had to wear special shoes because of **arch problems**. I have always had problems in my **feet, lower legs, ankles and knees** from this. My pain was exacerbated by being a Kung Fu competitor in my young adult years. Now, in my 50's my lower legs and feet have really caused me pain. I started Max GXL in June and in about three weeks all my pain and popping was gone!

SKIN

Yan Hua – Calgary Regarding the allergy of my daughter, I am not sure whether she is allergic to any food or to sun ray, just finding some patches of rash coming and going for few months. Two weeks ago i let my daughter take two capsules (one morning, one in the afternoon or evening) of Maxgxl for one week, and one capsule per day for the second. Now the rashes almost gone, in addition to that I noticed she has other changes, such as her complexion is looking fresh and pretty, and she is not so addicted to pop drinks as before, also she is not moody now. I am going to keep her on gxl for a couple of month to get rid of more toxins.

Marie Colman, Chino Valley, Arizona - A few years ago, I fell asleep in the sun. It wasn't the first time I had subjected my skin to major sun damage. As a result, my **dermatologist** was keeping a regular check on my upper back and shoulders, and I had had a few pre-cancerous lesions removed. In July of this year, my upper back suddenly turned to a **sandpaper** like consistency and over a 10 day period more than a dozen small **lesions** began to gain shape on my back. I immediately called my **dermatologist** so that he could check it out. He was astounded, having never seen anything like this happen in such a short window of time. He removed the **lesions** and did a follow-up on me just a few weeks ago. My skin looks dramatically better overall, but my upper back has shown dramatic improvement. My opinion: well I have been taking MaxGXL since April 21st of 2008. Past the liver, the second major storehouse of glutathione in our bodies is our **skin** and this protein is very important to our skin's health. As I raised my glutathione levels, it seems that the damaged and pre-

cancerous cells were forced out! I'm amazed!

Biyanka Wright, Chino Valley, Arizona - I have suffered from **eczema** for years. Being a beautician, the chemicals and products I use on a daily basis exacerbates the problem. I have had to resort to numerous prescriptions, both oral and topical to help with the discomfort and I have subjected myself to steroid shots when I am really bad. I started taking MaxGXL in June. Not only have I felt **increased energy** and have **lost weight**, but it has provided a great impact to my skin.

SLEEP

George Richer, Ontario, Canada - Over the years I have tried many natural products as well as medications prescribed by doctors. Nothing has ever worked so well (and continues to do so!) as MaxGXL. I had joint problems in both hands. After only three days on MaxGXL, I could not believe how much better my left hand was. After five days, it was completely normal and the right 75 percent better. And by the 10th day, the discomfort was completely gone! Another pleasant surprise, is my balance, which has been terrible since a back operation in 1972. My balance now has greatly improved. The best improvement, I believe, is my energy level. I **sleep** so much better and wake up ready to GO! I am 70 years young and have the same or more zip than when I was 39! Thank you MaxGXL!

Charlene Ragsdale, Las Vegas, NV - I had a series of health issues beginning in the late 1980's. In 2001, I had a complete hysterectomy that helped my body to function better but I also developed some horrible side effects—especially a lack of **sleep**. After 4 days of being on MaxGXL, I **slept** through an entire night! In addition, when I would get up, I limped from a sports injury in my left knee. In recent years, I have had to wear a knee support so I wouldn't hurt and my knee would not swell. One morning after a week of being on MaxGXL, my son said, "Momma—you are not limping! What happened?" I have not had to wear my knee support in over two months! We live in Las Vegas and for the past three years, my husband has worked as a cook on the graveyard shift. You can imagine his erratic sleep pattern! After four days of being on MaxGXL, he woke up proclaiming, "That was the BEST sleep I have had in three years!" And he continues to sleep better, has more energy and gets through his long nights much better than before. We can now live our life to the Max!

Businessman John V, 61 said: "After about 5 days on MaxGXL I was able to **sleep** thru the night again. I used to wake up every hour and as such was very tired when I got up in the morning. MaxGXL has given me the sleep and I have also noticed an increase in my energy level. Watch out honey!"

Roxy - "I started taking the MaxGXL on Sunday. After all the Thanksgiving preparation (cleaning and cooking) and then all the people (40+) and the excitement and work of the day, I was very exhausted. I **slept** 10-11 hours Thursday-Sunday, which is very unusual for me. Even though I slept only 8 hours Monday and Tuesday, I still felt very tired. I **slept** only 7 hours last night and woke up this morning feeling good, **arthritis** not hurting. I know it is too early for a good assessment, but this is the quickest any supplement has worked for me, and I have taken a fist full of supplements three times a day for more than 10 years. I will let you know in a few more weeks what my results are. If this works like it looks like it might, I will want to send this info to some of my contacts that I know would also want to try it."

Elaine B, NC - "When I first started taking MaxGXL back in May of 2008 I really did not expect very much. I had taken different supplements for many years with not much to talk about the effects. Man, was I in for a big surprise. Within 48 hours I could tell that my **energy level** was going up and that I just generally felt better. But, this was not the BIG surprise for me. The BIG surprise was my **sleep** habits changed. For as long as I can remember I have suffered from **insomnia**. It would take me what seemed like forever to actually go to **sleep**. Then about 10 years ago I started working nights in a hospital.... This really had a negative effect on my already poor sleep ability. After starting on MaxGXL I suddenly realized that I could actually lay my head down on a pillow or whatever was convenient and be asleep in 5-10 minutes. This was unbelievable to me. So I started paying attention to how well I was sleeping. When someone works nights it puts your body and mental ability into some other atmosphere. It is hard to switch to sleeping at night when you are off so you spend most of your time staying up at night even when you are off. You live in a different world from most other people. And trying to **sleep** in the day time is not a **restful, relaxing sleep**. I have had days when I would wake up and

wonder what day it was or wonder if I was supposed to go to work today. The mental thinking process goes into numb land for awhile and you just can't think straight. Not with MaxGXL... All of that confusion, that mental uncertainty has vanished. I now feel like a normal human because I can get the **sleep** that I need to survive. Being able to sleep as I should is truly a blessing. This to me is worth more than anything else about MaxGXL.

SCOLIOSIS/SPONDYLOLISTHESIS

Hi, my name is Cindy M. I've suffered with severe **scoliosis** since I was 12 years of age. I also have a lower back problem that caused my scoliosis; which is known as **Spondylolisthesis**. I was in severe pain. I went through surgery at 13 and was in a body cast for 9 months and in bed for 6 months. I couldn't sit up or hang my leg off the bed. I was basically confined to my bed. They did the surgery to slow the curve down and I didn't have your typical surgery that you would have for scoliosis, because of my **Spondylolisthesis**. I had a Harrington type pin placed in my lower back instead of rods. Prior to all of this I wore a Milwaukee brace for two years. It didn't work because of my lower back, however. Now they would like to go in and put four Harrington rods in from top to bottom. And also some stainless-steel pins in the front to secure what they would have to do in the back. My doctor at University of Michigan has told me that he would like to tell me that he's doing it to get rid of my pain but he is not. My spine's not just curving, but it's turning my torso and they would lie to try to stop that. I have suffered every day of my life with this pain. I have tried several different natural methods and I didn't choose synthetic pain killers because this would be with me for the rest of my life, and I would have to take stronger doses with each passing year. The day I was introduced to the glutathione supplement, I was in severe pain. I was very skeptical because of all the things I've tried. But I was always praying something would work. So I took the glutathione supplement and I went and rested because I didn't think I was going to be able to go do errands that I had to do. Twenty minutes later, I started feeling better. I got up and started moving around and my pain was gone! I didn't say anything to my family because I was still skeptical, wondering "was this really this supplement? How could it work this fast?" So I finished the week's supply and two days went by without the glutathione supplement and I felt like I had been hit by a Mack truck. I was back to severe pain, calling everyone to see if I could get some more. I've never done crack, but I felt like an addict. I was looking for that fix. At that point I knew that it was the glutathione supplement. It's been almost four months now, and the glutathione supplement has changed my life. My quality of life has never been this good since I was a little girl. I know everybody is different. It might not work on some people as fast as it did on me, but it was like the forest fire was put out on my back. I still have scoliosis but I'm not living with pain anymore.

SURGERY

Rob Riopel, Calgary, AB When I was first introduced to Max GXL in the spring of 2009 I could not even conceive the impact it would have on my life. I went through two back surgeries in the fall of 2009 and while the first one was a day surgery, the second one came after spending 3 weeks in the hospital. While in the hospital I was only able to take what they gave me for medications etc., so I was not on my Max. The doctor told me that I would be looking at 3 to 6 six months of recovery before I would even be able to consider physio.

The moment I left the hospital I started back on GXL and within 6 weeks (not months) my doctor started me on physio because the inflammation in my back had gone down enough that I was again standing straight up and able to walk well.

I will never stop taking Max products and have referred it to a number of my friends and fellow trainers that have experienced back pains like mine.

Thanks MAX!!!

WEIGHT

Fernando Torres, Corona, California - I was introduced to Max GXL by family. They explained all the benefits of the product, but I still wasn't truly convinced. I started on the product in January 2008, almost one year after a one-week stay in the Intensive Care Unit for some serious health problems. Within 2 weeks of starting MaxGXL,

I noticed my energy level had risen. I had more energy to get myself to the gym, I started lifting heavier weights, started to run on the treadmill, which I had not done for a few years. I started to do the things that I really wanted to do. I'm now exercising five times a week since I have more energy to do it. I am eating better, and not craving all the junk I used to eat because I don't feel stress like I did before. I am not waking up during the night. I am able to sleep better and therefore feel refreshed every morning now when I wake up. **I have dropped weight** since I have the energy to burn more calories. I really feel like a new man! Thank you, Dr. Robert Keller for formulating this amazing supplement! You are a genius! MaxGXL is truly life changing!

Julie Malamut, Glendale, Arizona - MaxGXL has done so many wonderful things for me. My skin, hair, and nails look healthier. My energy level is wonderful--I'm not a zombie all day long. I sleep better at night. **I've lost more weight because it eliminates inflammation and toxicity.** I'm in a size 6 everything and on my way down to a four which is where I think I'll be done! It's exciting!! Overall, I FEEL so much better because of the toxic elimination and reduction of inflammation. It heals at the cellular level. So, things are healing that have never healed. For instance, my MRI's on my back for the last 7 years have shown a great amount of **degeneration** in discs in low back as well as minimal disc space due to what Dr's say was trauma as a child (carrying things too heavy for my body--boxes, perhaps?). Recently, I had an MRI on my spine and a neurosurgeon from Barrow Neurological said that my spine looked like a woman in young 20's. It's healthy--there are no signs of degeneration and the disc space looks good. To me, this is INCREDIBLE! God has answered a great many prayers through this instrument."

Evan & Barbara Olson, Eureka, CA - I have been an associate for about four months, and my wife and I have been taking MaxGXL since then. My wife and I are 55, and she has needed reading glasses since she was about 40. Of course as time has gone on, she has needed to increase the strength of the glasses more and more. She could not read without them. The other day, we went to breakfast at a restaurant, and she could read the menu, even the smaller print! It wasn't easy, BUT SHE COULD DO IT! I was amazed! I am nearsighted, and have worn glasses for many years, and I swear that my vision is definitely improving. When I go to work, I take my glasses off, shortly after getting there, and don't put them back on until it is time to go home. I am due to see my optometrist this year, so I am going to wait a couple more months, and then see if there is any change in my prescription. We are firm believers in MaxGXL, and actually have several other great results from using the product.

Walking/Knee Pain

James E. Greene, Age 63 - "As a young man I loved to participate in all sorts of sports. In 1980, I started jogging with a group of fellow employees. We ran 5 miles 3 times a week around the streets of Charleston SC. I am a big man and this pounding and the back injury I suffered in the Navy took a toll on my knees. Since the early 1990s, I have been unable to run or jog. By 2000, **walking** up steps hurt. I used the hand rail to help pull myself up. Carrying groceries in the house was a chore that left my **knees** hurting for some time. I have had physical therapy, injections and have been taking a prescription anti-inflammatory drug for several years. All this and I still had no results. I started taking MAX-GXL on May 14, 2008. While at the fly in at Salt Lake City on May 20, 2008 to learn more about MaxGXL, and as we were walking back to the hotel from an awesome dinner with the Founders. There were 3 or 4 steps we had to climb, my knees nearly killed me. About 5 days later on Sunday May 25, 2008, I found myself carrying a computer and monitor up the steps to my house without pain. Also now I can even cross my legs while sitting for the first time in many years. I know my knees are not healed, but I know in the coming days, weeks and months ahead they will continue to improve with MaxGXL. I look forward to play ball with my grandkids."

J.B. Outrider, Prescott, Arizona - In 2003 I woke up one morning and couldn't walk. After going to a number of doctors, I got no better and lost my job. Since then, I have never been 100% healthy. Some days have been mostly pain free, but the majority of the time, I've been in pain. Last month a friend came by to visit because he knew I couldn't get out much. He shared that a friend of his had told him of a new health product that was showing fantastic results. I had already tried so many potions and pills that I wasn't too anxious to jump on

another health bandwagon. I had been disappointed so many times before. But I eventually became curious as I watched what it was doing for my friend. He gave me some sample product and the rest is history. The first few days I noticed I was sleeping better. About the fourth or fifth day my left knee which has given me consistent problems and had been locked up for weeks just let go. The swelling went down and never came back. Then I noticed my balance start to come back and in the second week the strength in my legs started to return. I get stronger each day, and am no longer consistently dependant on crutches. I was having some trouble with my hands as well and that is gone too! I look to the future now with a much greater degree of hope as things are improving way beyond what I had ever hoped for. Thanks to Tom & Gertie and GLX!
